Natalie Seeto

Full Stack Developer

TECH SKILLS

Languages
Javascript, Node.js,

Frameworks
React, Express.js,
Handlebars

Testing
Tape, Shot, QUnit, TravisCI,
Istanbul

Databases
MySQL, PostgreSQL

Tools
Git, npm, Heroku

Methodologies
Agile, TDD

ABOUT
Worked as a clinician in a variety of hospitals in the UK and Australia. Decided to become a software developer, as I am curious, enjoy problem solving and continual learning. I see technology as a tool to solve a problem and am eager to build reliable software delivering value to clients.

EXPERIENCE
Founders and Coders (Mentor and Freelance Developer)
Teaching Founders & Coders' 16-week software development course with a heavy focus on JavaScript (Node, Express, React), TDD (Tape, Istanbul), pair programming, PostgreSQL and agile project management.

CURRENT PROJECT

iMacaque | React | Node.js | Express.js | Postgres |

A web app designed for monkeys (yes monkeys) assisting in neurology research. Working in collaboration with PhD students at Cambridge University.

PERSONAL PROJECTS
cohealth   (currently in design)
Early stage health tech start up that stores and organizes users' health information. Allowing easier movement of health information between health systems.

{ her + code }
A blog interviewing individuals who are under represented in tech and covering organisations who are at the forefront of increasing diversity and inclusivity in within their work place.

EDUCATION
Full Stack Web Development, Founders and Coders

Master of Public Health, University of Sydney

SELF-LEARNING
Ruby: Learn Ruby (Codecademy, 2017), Learn to Program (Chris Pine), The Well Grounded Rubyist (David A. Black)
SASS: SASS Workflow (Udemy), SASS Fundamentals (Frontend Masters).
